ECEn 330 Source-Code Pass-Off Sheet

(Staple this sheet to the front of your source-code).

Student Name_____   Lab#:_____   Submission Date: _____   Score:_____

Reminder

You are responsible to ensure that your code meets the coding standard as described on the ECEn 330 web page. For convenience, here is a short list of common mistakes but remember that the coding standard as described on the class web page is the final word. Code that does not conform with the coding standard will lose points.

1. Did you use the integer types `int, short, long`?
2. Did you use `char` for anything but declaring a string?
3. Did you forget to define constants using `#define`?
4. Did you use the constants `0` and `1` incorrectly?
5. Did you leave any debug `printf()` statements in your code? You may leave any `debugStatePrint()` functions intact in your code.
6. Did you use incorrect indentation?
7. Did you forget to completely comment your code?
